EDUCATION

University of Bucharest

- Bachelor in Computer Science

Bucharest, Romania

Expected July 2027

EXPERIENCE

[Discord.js](#) | The most popular Node.js library for building Discord integrations

Maintainer

May 2022 – Present

- Pioneered the development of the @discordjs/ws package by implementing a foundational RFC for the new WebSocket layer. The new implementation offers the possibility of horizontal scaling, while being notably more resilient and maintainable.
- Spearheaded a new interface for our @discordjs/builders package. This initiative, done in collaboration with other maintainers, led to a more consistent public API, better type-safety and more readable runtime data validation errors.
- Architected and implemented the @discordjs/brokers package, aiding developers in creating distributed, multi-process Discord bots.
- Authored the @discordjs/proxy package and subsequent discordjs/proxy Docker image, an essential tool in ensuring distributed applications conform to Discord's REST API rate limits.
- Upheld code quality across our monorepo by reviewing pull requests.

[ChatSift](#) | Tools for moderating & managing online communities

Lead Maintainer

June 2021 – July 2024

- Architected a microservice stack responsible for processing upwards of 5 million daily events.
- Implemented a web dashboard using Next.js responsible for product configuration, backed by a RESTful API (Express-like/Postgres/Zod) with end-to-end type safety on route bodies and results.
- Fully containerized the application using Docker, integrated with a Github Actions pipeline.
- Designed a tiny, binary encoding format for storing objects with a known schema, leading to much lower memory footprint than JSON strings.

SKILLS

Programming Languages: JavaScript, TypeScript, Rust

Frameworks: Express.js, React, Next.js, React Query, TailwindCSS

Technologies: Node.js, Bun, PostgreSQL, Prisma, Redis, Docker, AWS (S3), RabbitMQ

DevOps & Automation: Linux, Git hooks, GitHub Actions, Turborepo

Languages: Romanian (native), English (fluent)
